

# 3D PRINTERS

St. Joseph High School - Trumbull

## 2023-2024 PROJECT UPDATE

Grant Amount: \$2,560

Project Cost: \$2,560

750 Students Impacted

Grades 9-12

**PURPOSE:** To promote creativity and critical thinking by allowing students' ideas, concepts and designs to come to life.

**IMPACT:** Creative thinking impacts lessons! The 3 D Printers create an energy in the classroom that is evident by watching the excitement on students' faces when they see their final creation. The printers were used primarily in technology courses but were available for the entire school community. Drama production was able to create props needed and student ambassadors created small 3D SJ logos.

**FUTURE PLANS:** The school will fund the materials needed to support the printers in the future.
