CYBERSECURITY AND THE INTERNET OF THINGS

St. Joseph High School, Trumbull

2023-2024
PROJECT UPDATE

Grant Amount: $2,204
Project Cost: $2,204

50+ Students Impacted
Grades 9-12

PURPOSE: To expose students to the fundamentals of cybersecurity, which include coding, networking, encryption and cryptography. This grant helps create an awareness in students and opens their minds to future occupations in the world of technology and cybersecurity.

IMPACT: The grant has created an excitement for learning. The Raspberry Pi kits are fun and make the learning enjoyable. Students are eager to come to class, performed well and successfully completed all projects and tasks assigned.

FUTURE PLANS: The course will continue and St. Joseph High School will finance what is needed.
