

SAINT MARY SCHOOL HAS SMARTS

St. Mary School, Ridgefield

2023-2024 PROJECT UPDATE

Grant Amount: \$7,500
Project Cost: \$25,600

115 Students Impacted
Kindergarten - Grade 5

PURPOSE: To help bring interactive board innovation to Lower School students. This technology boosts student engagement, supports different learning styles, provides the ability to save and share lessons and offers access to online resources.

IMPACT: Teachers use these boards on a daily basis throughout the day. Morning work, often interactive, is posted on the smart boards. It connects with the school's personalized learning initiative, allowing teachers to innovate and differentiate their instruction and for vertical alignment of the curriculum. Students are engaged and excited about learning with the interactive boards. Their willingness to participate and get involved in class discussions and activities has increased. The community is supportive as these boards are found in local public schools.

FUTURE PLANS: The school hopes to expand these interactive boards into every classroom.
